

# Good Time Charlie

## - MOJO ENERGY -

Good Time Charlie (GTC) - Mojo Energy - was nominated for the Norwegian Grammy awards – Spellemannsprisen 2008! GTC have always had a dedication to tradition, style and the spirit of the music they've played, something for which they have received international ovation.

With their fourth album "Mojo Energy", the band has taken a step towards a more raw and energetic world of music. The musical landscape which they now inhabit can be named "Garage Soul" - a mix of the intensity of the garage rock of the 60s, combined with the explosive and melodic sound of authentic soul music. Get ready for plenty of nasty guitar licks, wailing harmonica, deep bass and rumbling drums! - This is genuine Garage Soul!

The album is produced by GTC and Yngve Leidulv Sætre (DumDum Boys, deLillos, Datarock, Magnet) at legendary Duper Studio in Bergen.

"Mojo Energy" contains exclusively original material, and proves that GTC are one of Norway's most progressive and hard working bands.

The 2010 edition of the band is: Arle Hjelmeland on vocals and harp. The young and talented Steinar Karlsen plays the guitar, while the solid back beat is delivered by Aksel Fjæra on bass guitar and Hans Petter Solli on drums.

SO KICK OUT THE JAMS!
